

## PARTNERSHIP

We cordially invite you to participate in the European Symposium on Analytical Spectrometry (ESAS) taking place from June 24<sup>th</sup> to 28<sup>th</sup>, 2024, in the vibrant city of Warsaw, Poland. This prestigious event will be chaired by the esteemed Prof. Ewa Bulska.

**ESAS** is a highly anticipated biennial symposium that has been a prominent fixture in the scientific community for over decades. Its inception in 2008 in Weimar, Germany, marked the convergence of two significant scientific gatherings: the International Solids Sampling Seminar, which dates back to 1984, and the European Furnace Techniques Symposium, established in 1994.

The symposium serves as a distinguished platform for the exchange of knowledge and ideas on all aspects of analytical atomic spectrochemistry, including fundamentals and instrumentation, mass spectrometry, fluorescence spectrometry, sample introduction techniques, laser ablation, glow discharge, isotopic analysis, speciation, quality control, and numerous industrial applications (pharmaceuticals, cosmetics, clinics, food, environment, geology, forensics, archaeometry, and others).

The conference will be hosted at the University of Warsaw Biological and Chemical Research Centre, a venue that fosters interdisciplinary research and the integration of cutting-edge technologies with business. The conference aims to bring together experts in spectrometric research from diverse scientific institutions, as well as business representatives involved in various types of spectrometry techniques.

**ESAS2024** offers a perfect setting to share the latest achievements, exchange invaluable experiences, explore innovative ideas, and forge collaborations. Manufacturers will have the unique opportunity to introduce and present their latest products in the exhibition area adjacent to the poster sessions, ensuring close interaction between conference participants and exhibitors.

We invite you to join us at **ESAS2024** and become an integral part of this exceptional scientific gathering. Your support as a sponsor will not only contribute to the success of the symposium but also provide unparalleled visibility and networking opportunities for your organization. We look forward to welcoming you during the event, where science, innovation, and cooperation converge.

See you in Warsaw!
